

Summary of the operating cost Benefits of a ThermaSteel building

Square feet of conditioned Space:	13200
Estimated square foot operating cost to heat and cool annually based on the traditional construction (steel studs with fiberglass insulation):	\$1.10
Annual operating cost to heat and cool:	\$14,520.00

By stepping up to ThermaSteel this building will realize savings cutting the operating cost to heat and cool by at least ½ that of Traditional construction.

Annual Savings:	\$7,260.00	
Number of years to break even on the cost to step up to ThermaSteel:	4.18	
Estimated square foot cost to step up to ThermaSteel:	\$2.30	\$30,360.00

After the step up cost is recaptured, the annual savings are pocketed and the savings increase as operating cost increase.

Annual square foot operating cost to heat and cool	Annual Savings:
\$1.10	\$7,260.00
\$1.20	\$7,920.00
\$1.30	\$8,580.00
\$1.40	\$9,240.00
\$1.50	\$9,900.00
